Wenche Nordberg - Grandmother Denmark - Presentation

Astrology - Pluto's transition from Capricorn to Aquarius.

Hello, my name is Grandmother Wenche from Denmark, and I am delighted to be here to share with you some information about Astrology with a specific focus on the Planet Pluto which is currently transitioning from Capricorn to Aquarius.

From the Earth's perspective, the planets appear to be circling around over our own planet Earth. Some of them like Mercury, Venus and Mars are close to us, and some very far away like Neptune, Uranus and Pluto. Of course, we know that all planets including the Earth are orbiting the Sun.

Pluto is a little dwarf planet, which was discovered in 1930. It is actually smaller than the Moon but with a very powerful energy. It has a tremendous influence on our planet earth.

It spends 248 years orbiting the Earth, in an elliptic circle. This is why it takes between 12 and 32 years to pass through a sign.

Right now it is transiting from Capricorn to Aquarius. In astrology Pluto represents Death and Transformation, which is the theme of this year's Council Meeting.

We refer to Pluto as the Ruler of the Underworld, representing Death, Transformation, Will and Power. It brings us into contact with unconscious areas of the psyche that we need to integrate. Because it stays in one sign of the zodiac (the circle of signs) for a long time, it will act on a collective level.

Maybe you have heard about Pluto over the last months, because its ingress into the sign Aquarius took place the 23rd of March of this year. When a planet moves into a new sign and especially the slower moving, we all can feel it, and it will affect the whole world.

Of all the planets Pluto has the most powerful effect.

Last time Pluto moved into a new sign was in the sign of Capricorn in 2008. Then the financial crisis started. The banks that did not have a properly secure foundation – they cracked. There was a lot of economics restructuring in business communities.

On the personal level, in the last years there have been changes in leadership where some people have been exposed and removed due to their misuse of power, like the “Me-too” movement for an example. The keyword here has been Responsibility for 20 years.

Pluto’s power is to break down what is not sustainable and to build up new and better foundations for the future.

From 2008-2023 Pluto has been in the sign of Capricorn.

Moving into Aquarius will take about 1 year.

First a dip from March 23 to June 11, then from January to September 2024. In January 2025, it will make its final move into Aquarius, and will stay here permanently for 20 years.

(Last time Pluto was in Aquarius, was from 1532-53 and 1778-1799)

When Pluto is in Aquarius the key issue is human rights. We can see how this manifested when we look back in history.

For 2 cycles ago, between 1532-53, the most powerful person in the world was challenged and that was the Pope. The Catholic Church was not really respectful of human rights, so what Calvin did was basically saying – I protest- and so the protestant church was born.

One cycle later around the 1790s, you had an attempt to usurp the people in power and so the American Revolution and the French Revolution occurred during this period. The motto in the French revolution is “Liberty, Equality and Fraternity” and those themes will become big again in the next two decades with Pluto in Aquarius.

So, the big question is what can we expect to happen the next 20 years?

To try to answer this question, we have to look at Aquarius, and what this sign stands for.

It stands for communities, collective consciousness, internet technology, independence, originality, hope and visions, global networks and a lot more concerning common wisdom and human rights.

Faced with this energy, mixed with Pluto’s power, we can expect big changes in our social structures, whether we like it or not.

Community spirit and equality will be in focus.

We will see grassroots movements and rebellion change the status quo. Resources and climate will be in focus, as will sustainability and cooperation.

On the personal level it is time for new beginnings. It's time to contribute with our unique resources for the best of the community.

To focus on freedom and equality, and fight for what we believe in.

Go with your heart and use yourself in the service of the society and your fellow human beings.

Thank you
Wenche Nordberg

Grandmother Swami Nitya, Notes

“Death can never be seen and separated from life.

So how we see life, determines how we see, and experience death.

If we look at life, through the materialistic perspective, and we identify solely with the body, and people think of themselves as separate entities (so called individuals) , separate from all around, including the universe, then the material body, of course, dissolves. Gone!

However know that this process starts the moment we are born, everyday cells in our body “die” and are reborn. This process exhausts itself at some point and what we observe is the “final dissolution”, any thoughts about afterlife.. or continuity.. are mere fantasy.

The problem and suffering here comes from our attachment to the form!!!!

Now the second perspective on how to see life.. is very different.

If we understand life to be a living entity, in permanent exchange with all life around us, and even are aware there is an intelligent life-forces... in us and around us.. that makes the permanent change possible, then something continues after the form/ the body is gone!

The life-force continuous, it is referred to in many form... as Light, as Divine force.. or simply Biological Energy.

Which means there is no death... that life-force...and we IN it/ as IT is continuous.. i.e. it is; “we” are immortal.

But be careful about what you understand.. as “we”...or “I”..., realise you are not a material being, composite of Data, as the society tells you, but a living force, beyond our mental grasp. . . .

Many refer to this as consciousness.. and how we understand this is subjective (through our conditioned mind).

All versions of Quantum theories confirm this.”

Talk on Practical suggestions on Death - Spain

Our feelings and wishes about death and the circumstances before and after it are best discussed with family and loved ones. It is a conversation you may have several times during your life as your wishes may also change over the years.

This is a very important topic and talking about it helps to take away the fear of death. The unknown is scarier than the known and natural. And you never know when it will happen.

It is a great help if there are other people outside the immediate family who can help in these critical moments.

If everyone knows what your wishes are for the last moments of your life, what you want them to do with your body before your death, during the wake, the burial and afterwards, everything is easier for your relatives, who are very affected at this time and it is difficult to make decisions.

BEFORE DEATH

If you are ill it is very important that your family and your doctor know what you want so that if you are in a coma they know what to do.

In Spain you can make Advance Directives, (Madrid Registro de Instrucciones Previas Consejería de Sanidad Dirección General de Coordinación de la Atención al Ciudadano y Humanización de la Asistencia Sanitaria Registro de Instrucciones Previas Sagasta, 6 28004 Madrid Tfno: 91 338 77 99

<https://www.comunidad.madrid/servicios/salud>

<http://www.comunidad.madrid/servicios/salud/instrucciones-previas>.

In this file your wishes are registered, it is what replaces the living will that existed before.

ONCE YOU HAVE DIED

In the advance directives it has already been reflected what you want them to do with your body. It is good to know that you can die at home if the doctors can no longer do anything for you. You can also have the wake at home in a kinder and cheaper way.

There are death insurances that cover everything or you can have a piggy bank for this event.

AFTER DEATH

DEATH CERTIFICATE - ORIGINAL ALWAYS KEEP IT, never hand over the original.

MAKE NOTARISED COPIES (MINIMUM 2)

When the notarised photocopy is to be handed in for any procedure, take the original with you in case they want to see it, but never leave it, the notarised copy acts as the original.

KEEP THE ID CARD OF THE DECEASED (in case it is needed at another time, a photocopy can be certified in case it is needed).

If there are judicial procedures of accident and/or autopsy, also make a certified copy before a Notary to always keep the original in case it is requested in another procedure, never hand in the original, always make certified copies to hand in.

Look for life and accident insurance and inform the insurance companies of the death in writing and hand it in at an office of the company and have them stamp a copy of the letter with the date of delivery so that they cannot say that they do not know anything and that the deadline has passed. (I enclose a model of the letter).

Talk to the personnel department of the company where the deceased worked so that they can say if they need any documents to hand over and ask if the company had taken out any life or accident insurance for the deceased, so that they can process whatever is necessary. If documents have to be handed over, they should always be accompanied by a written document listing the documents to be handed over and that they sign or stamp the receipt of the document and documentation on a copy for safekeeping.

Grandmother Pascal Joris – Meditation with Butterflies

It was a most inspiring ceremony where the audience circle meditated to flute music. Pascal introduced all present to a Ceremony honouring the Air Element through the use of Beautiful Butterflies.

“Butterflies are world travellers. The Monarch butterfly is known to fly from Canada all the way to Mexico and back. They travel through the element Air.

I will now ask You to go inside looking for that one wish You have for Mother Earth and it's habitants. And then we start the Butterfly Ceremony”

Talk on Food for the Spirit Soul Self - notes

Hello, thank you for coming to the conference and for coming to this talk. Over the last days we have all been introduced to the concept that life and death are One - there is no separation between them - just as there is none in nature. Everything is energy - made from the five elements of Earth, Air, Fire and Water which are visible and Ether which is invisible. Everything comes from the invisible into the visible and goes back to the invisible, over and over again. Just as we see in nature.

We are not a body with something called a soul.

We are a being of energy, which is multi sensory and multi dimensional, which has chosen to come to planet earth, to experience adventures and demonstrate the power of Love.

We are not our bodies :we are not our minds: we are not our emotions, our gifts, talents and abilities.

These are our tools to co create in alignment with our Spirit Soul.

We are beings of love and light

Light is Love we can See - Love is Light we can Feel.

The body is limited to five physical senses and three dimensions.

It cannot comprehend what is beyond what it sees, hears, touches, tastes and smells.

It is limited and restricted.

I like to describe us as being two bodies, which I call Big Self and small self.

Big self spelled with a capital S and small self with a small s
or

As Spirit Soul Self and ego self.

The Self with the capital S sees everything, feels everything, knows everything. The self with a small s is meant to serve Big Self.

But most have forgotten Who and What they are.

And have identified with the visible, audible tangible world, to the exclusion of the invisible world.

Our indigenous ancestors knew they were One with their Divine Creator.

They operated with a Spirituality of Blessedness.

They blessed all aspects of life.

Many experiments were carried out some with disastrous consequences which led to the loss of the memory of the Sacred and the Sharing of Divine Nature - the divine nature of the Soul.

Humanity forgot that there is only Oneness - Unity- that what is in one is in each particle, each atom and what is in each one is in the whole.

There is a Divine Will and a True Will of the soul which are united - this is the Big Self.

The small self has a free will, it can choose to co create with big self or to deny the big self.

Big self is Real with a capital R and operates on the vibration of Love.

Small self operates in a reality with a small r which operates on False Evidence Appearing Real (fear.)

In the fear vibration, we Forget Everything And Run when we deny our true nature.

Once we awaken from the dream of separation, we begin to Face Everything And Remember - now we start taking control of our mind and bless all circumstances.

And when we do we realize that the Big Self operates from the Heart and is the Real Doer.

The ego's role is to follow the inner guidance, the inner teacher of the heart, and to serve as the tool (or instrument) of the soul and radiate Love to all beings Whoever and wherever they may be.

Love is For Giving away.
And then For Getting back
Love must be kept in constant flow.
It is an endless circle..
When I forgive, I forget the mistakes small self has made.
There have been many mistakes - mistranslations - which have led to misperceptions.

We need food for the body and food for the soul, all of which is available in abundance, when we remember to bless everything in our lives.
I grew up with the concept of
If the Heart can Conceive it, and
The Mind Believe it, then
I can Achieve it.

We are all familiar with the phrase A B C.
In reality with the capital R, the process is seen be
Conceive, Believe, Achieve – CBA.

Our focus must be on giving love, then getting love and knowing that the Power of Love always works to restore balance.
The love of power creates only chaos and separation.
Peace comes when the When the Power of Love Replaces the love of power.

Notes on the Talk by Lola Roma on The Sweet Revolution
This is the link to the Dulce Revolución
website <https://dulcerevolucion.com/>

This is their proposal "Jubilados Insolventes Activos,
Desobedientes y
Creativos".(Active, Disobedient and Creative Insolvent retirees).

<https://dulcerevolucion.com/campanas/jubilados-insolventes-activos-desobedientes-creativos/> Initiative according to the experience and experiences of Josep Pàmies Breu

In the society we are living in of profound changes that affect the freedom of individuals, their health, food security, education without impositions, energy sufficiency, the right to spirituality without dogmas, among many other essential fields for human development, we see no other way than to lead, from the freedom that comes from being retired seniors, without burdens or responsibilities, the alternatives that allow us not to depend so much or at all on the States, which have become organs of oppression of the citizen.

To lead this movement to create another system parallel to the oppressive one, we propose the formation of groups of insolvent retired grandparents, so that they can be the visible head of all initiatives frowned upon by the "system", with the security that they cannot be conditioned by the constant threat of fines, dismissal from companies or administrations, the seizure of assets and/or the withdrawal of custody of our children.
